

Disposable Trocar

Enables smooth instrument exchanges
— a trocar you can rely on

Why Choose Us?

Experienced Professional Manufacturer

- Over 10 years' professional manufacturing experience leads to top-tier quality
- Doctor-approved and market-acclaimed products

Excellent Customer Support

- All messages will be replied within 24 hours, and yes, we are usually much faster than that
- Engineers and sales representatives work together to solve any concern of yours

Competitive Advantages

- Patented thread design minimizes trocar slip-outs and has the highest peak retention force compared to other similar products
- Bladeless tip trocar allows for endoscopic optical entry

Deadly Dedication

Durable Universal Seal

- Accommodates a wide range of instrument sizes(4.7mm-12.9mm)
- Designed to support frequent instrument exchanges

Double-layer Airtight Seal

- Maintains insufflation
- No reducer caps needed

Integrated Stability Thread Design

- Maximizes abdominal wall retention for minimal trocar slip-outs
- Greater Stability demonstrated in bladeless trocars
-Success[®] Disposable Bladeless Trocars have higher peak retention force than similar products from other companies

Low Drag Force

- Housing and seal are designed to reduce instrument hang-ups and provide low instrument insertion/extraction forces
- Funnel Lead-in enables smooth, one-handed instrument exchange

Optical Entry

- Visualization is optically guided by a 0° endoscope
- Enables visualization of tissue layers during insertion

Bladeless Optical Tip

- Reduced need for fascial closure
- Separates, rather than cuts, along tissue fibers, pushing tissue and vessels away
- Reduced risk of abdominal wall vasculature injuries with bleeding complications
